

# IDEAL IMPLANT

Natural feel. Beautiful look. Peace of mind.

**Now there are three types of breast implants: saline, silicone gel and the NEW structured implant.**

The structured IDEAL IMPLANT uses new technology to offer a natural feel and beautiful look with only saline inside for your peace of mind. Choose the IDEAL IMPLANT and enjoy advantages over saline and silicone gel implants.

## The IDEAL IMPLANT Difference

- Lower rupture rate and higher rupture strength—no silent rupture
- No MRI needed—look in the mirror to know that your implants are intact
- No sticky silicone gel from ruptured implants in the surrounding tissue
- Filled with saline that is safely absorbed by the body if ruptured
- Allows a smaller incision than silicone gel implants

**You deserve beauty without compromise.
